INSTALLATION
GUIDE

Air Monitor
Wall Mount Kit
HTRAM-WM-ALL

Honeywell

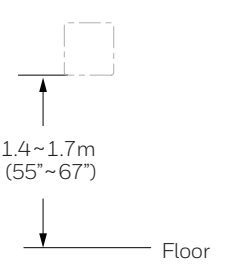

USER INSTRUCTIONS

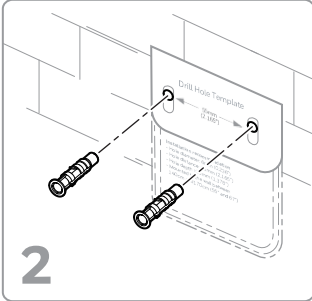

1) Drill 2 mounting holes on the wall. Recommended installation height: 1.4~1.7m from the ground. Recommended to the Drill Hole Template (Hole diameter: 6mm (0.236"). Hole distance: 55mm (2.165"); Hole depth >35mm (1.378").

2) Insert the plastic anchors into the wall.

1

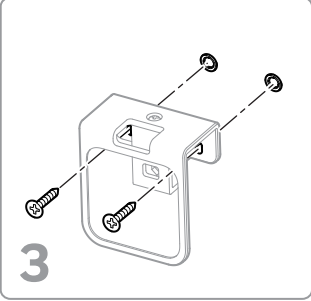

2

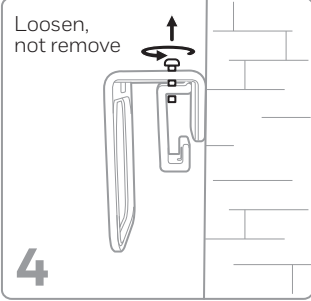

3) Secure the bracket on the wall using M4 x 35mm tapping screw.

4) Loosen the screw untill the block can be shaken, be careful not to remove the screw completely.

3

4

Drill Hole Template

55mm
(2.165")

Installation recommendation

- Hole diameter: 6mm (0.236")

- Hole distance: 55mm (2.165")

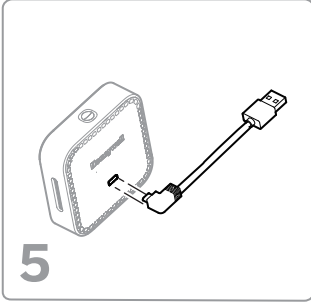

- Hole depth >35mm (1.378")

- Mounted to the wall between 140cm and 170cm (55" and 67")

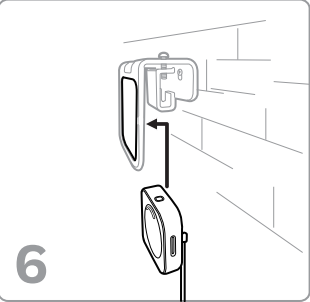

5) Insert USB cable into micro USB port.

6) Slide air monitor device into the bracket (make sure the screen is facing out and the button is facing up).

5

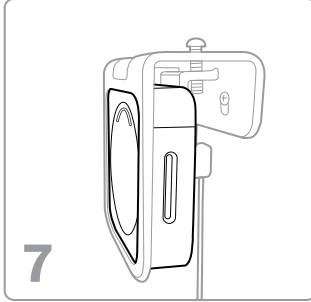

6

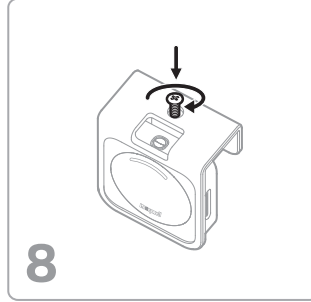

7) Make sure it fits into the inner frame of the bracket.

8) Tighten the screw on top and make sure the device is secured in the bracket.

7

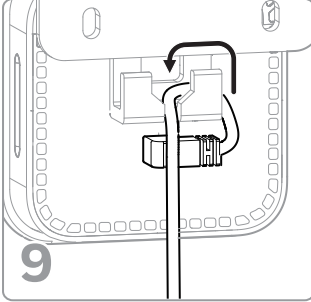

8

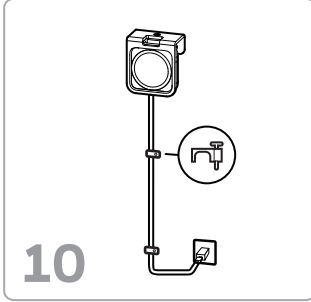

9) To secure the USB wire vertically, wrap it around the hook in the back.

10) Secure the cable to the wall. If there is excess or loose wire, wrap and secure it to prevent a tripping or choking hazard. Installation complete.

9

10

Strangulation HAZARD: Children have STRANGLED in cords. Keep this cord out of reach of children (more than 3 ft (1m) away). Do not use with an extension cord.
